The Responsive Classroom (RC) is an approach to teaching and learning that fosters safe, challenging, and joyful classrooms and schools, kindergarten through eighth grade. Developed by classroom teachers, it consists of practical strategies for bringing together social and academic learning throughout the school day. In urban, rural, and suburban settings nationwide, educators using these strategies report increases in student investment, responsibility, and learning, and decreases in problem behaviors.

ORIGINS, established in 1979 as a non-profit organization, has a mission to foster learning and community in schools and other educational institutions. Origins is the home of *Developmental Designs* and the Midwest regional center for the *Responsive Classroom* approach.
