INTEGRATING THE SMARTBOARD INTO YOUR CLASSROOM

➤ **Instructor:** Robin Schrot, Elmbrook School District

➤ **Course Description:** Participants will study SMART® Corporation's Level 1 training curriculum and learn how to apply it to the classroom. This beginner-level course will cover the following topics:

- **Instructional design for interactive whiteboards:** Learn design techniques for setting up lessons on an interactive whiteboard.
- **SMARTNotebook® Software:** Create interactive lessons and lesson activities using Notebook software 10. Learn how to maneuver through the software using tabs, toolbars and menus, and discover how to create properties, change properties and manipulate objects.
- **Hardware components:** Basic principles of touch, write and save, as well as troubleshooting and maintenance
- **Ink Aware:** Learn to write directly into Microsoft® Word, Excel® and PowerPoint® software, and use these common applications with your SMART product
- **Additional resources:** Find out how SMART supports you with a number of resources, including free training materials and an online community

Led by a SMART Certified Trainer and current Classroom Teacher, you will have ample opportunity to practice and develop learned skills, as well as receive feedback and suggestions on how to strengthen your use of the SMARTBoard® as a classroom tool. Participants will also learn how the many SMARTBoard and SMARTNotebook features can be used to differentiate, motivate and engage students in all subject areas.

All participants will receive a learner workbook that includes reference material, step-by-step activities and review exercises. The workbook is used during the course and is an excellent source for future reference.
